

Do I need hearing aids?

If you can answer yes or sometimes to 3 or more of the following questions, then perhaps you should consider having a hearing evaluation.

Please do not be afraid to see a hearing professional. We truly care and whether or not you decide to come to Concierge Audiology, LLC or another specialist.

I love my patients so much and I do understand how difficult it is to live with a hearing impairment and how difficult it is to communicate with a hearing impaired person. We specialize in fitting your lifestyle with the proper type of instruments, if needed.

Hearing aids are a sign of vitality. But most of what we fit are not really visible and you would not even have to tell your family or friends that you have been fitted. They are that discrete.
